

MOST CURRENT INFORMATION REGARDING TELEHEALTH – 12/3/2020

****Subject to change****

Documentation:

- Patient initiated and consent (written or verbal)
- Same as any face-to-face patient encounter, with the addition of the following:
- A statement indicating the service was provided via telehealth:
 - Patient location
 - Provider location
 - Names of all persons participating in the telehealth service and their role in the encounter
- For time-based services, include the clinical or physician time relative to the encounter
 - Document start and stop time or total time

NGS coding questions for E/M

1. Some E/M services require performance of 3/3 elements (history, examination and MDM). May these services be performed via telehealth?

Answer: Yes, these services may be performed via telehealth. History and MDM are readily accomplished via telehealth communication. Examination via telehealth is limited, but pertinent observations (e.g., as skin color, skin lesions/rashes, quality of respiration and evidence of wheezing or dyspnea, vital signs as reported by the patient) are feasible and may be counted toward an examination. The provider should note the limitation of the examination based on the telehealth context. Documentation requirements for E/M services (and all telehealth services) have not been changed by CMS. The medical record should include mention of the fact that the service is being performed via audio/visual telehealth technology.

2. Can time-based E/M services be performed via telehealth?

Answer: Yes, a time-based E/M service, during which >50% of time is spent in counseling/ coordination of care, may be performed via telehealth.

Telemedicine Platforms

- Examples of **Acceptable Platforms** (non-public facing): Apple FaceTime, Google G Suite Hangouts Meet, Skype for Business
 - Examples of **Unacceptable Platforms** (public facing): Facebook Live, Twitch, TikTok
-

New patient visit

- See grid below varies based on insurance guidelines

Description of service:

Telephone: Telephone services are non-face to face E/M services provided to a patient using the telephone by a physician. These codes are used to report episodes of patient care initiated by an established patient or guardian of an established patient.

If the telephone service ends with a decision to see the patient within 24 hours or the next available urgent appointment, these codes are not reported; rather the encounter is considered part of the preservice work for the subsequent E/M service.

Virtual Check in: A brief check in with your practitioner via telephone or other telecommunications device to decide whether an office visit or other service is needed. A remote evaluation of recorded video and/or images submitted by an established patient.

E-Visits: Communication between patient and provider via electronic communication. Include, but is not limited to email and patient portals.

Physician or qualified health care professional online digital evaluation and management, for an **established patient**, for up to 7 days, cumulative time during the 7 days;

Audio/Visual: Real-time interactive audio and video technologies (video chat) – Secure, real-time consultations between patients and network providers to diagnose and treat some conditions. Video modalities include but are not limited to technology commonly available on smart phones and other devices when medically appropriate to deliver health care services. (ex. FaceTime, Skype, Etc.)

****Medicare Patients:** Append modifier CS to the charge if the telehealth visit lead to **either an order for OR administration of a COVID 19 lab test**. Please also include verbiage in your documentation for this. (Appending modifier CS waives the cost-share for visits that result in the order or administration of the COVID-19 test, or the evaluation of an individual to determine the need for such a test)
